<ol style="list-style-type: none"> <li>1. What was your objective in trying to determine the AQ benefits of your clean energy programs? Why were you doing it (e.g. for SIPs or other legal obligations)?</li> <li>2. How did you decide what approach to use to estimate emission reductions?</li> <li>3. What factors did you consider?</li> <li>4. Who else did you consult with (either in-state or otherwise), and how did they help you?</li> <li>5. What challenges did you face in this process (e.g. finding the right data) and how did you overcome these challenges?</li> <li>6. Has your process for determining AQ benefits from clean energy evolved? If so, how and why?</li> </ol>
